

Statewide Truck Parking Solution

Dean H. Gustafson, PE, PTOE

State Operations Engineer

Date: 02/16/17

Virginia is a key National Freight Corridor

Source: Freight Analysis Framework version 3.4 (2013)

Combination Truck Volumes on the Nation's Highways

Federal Truck Parking policies

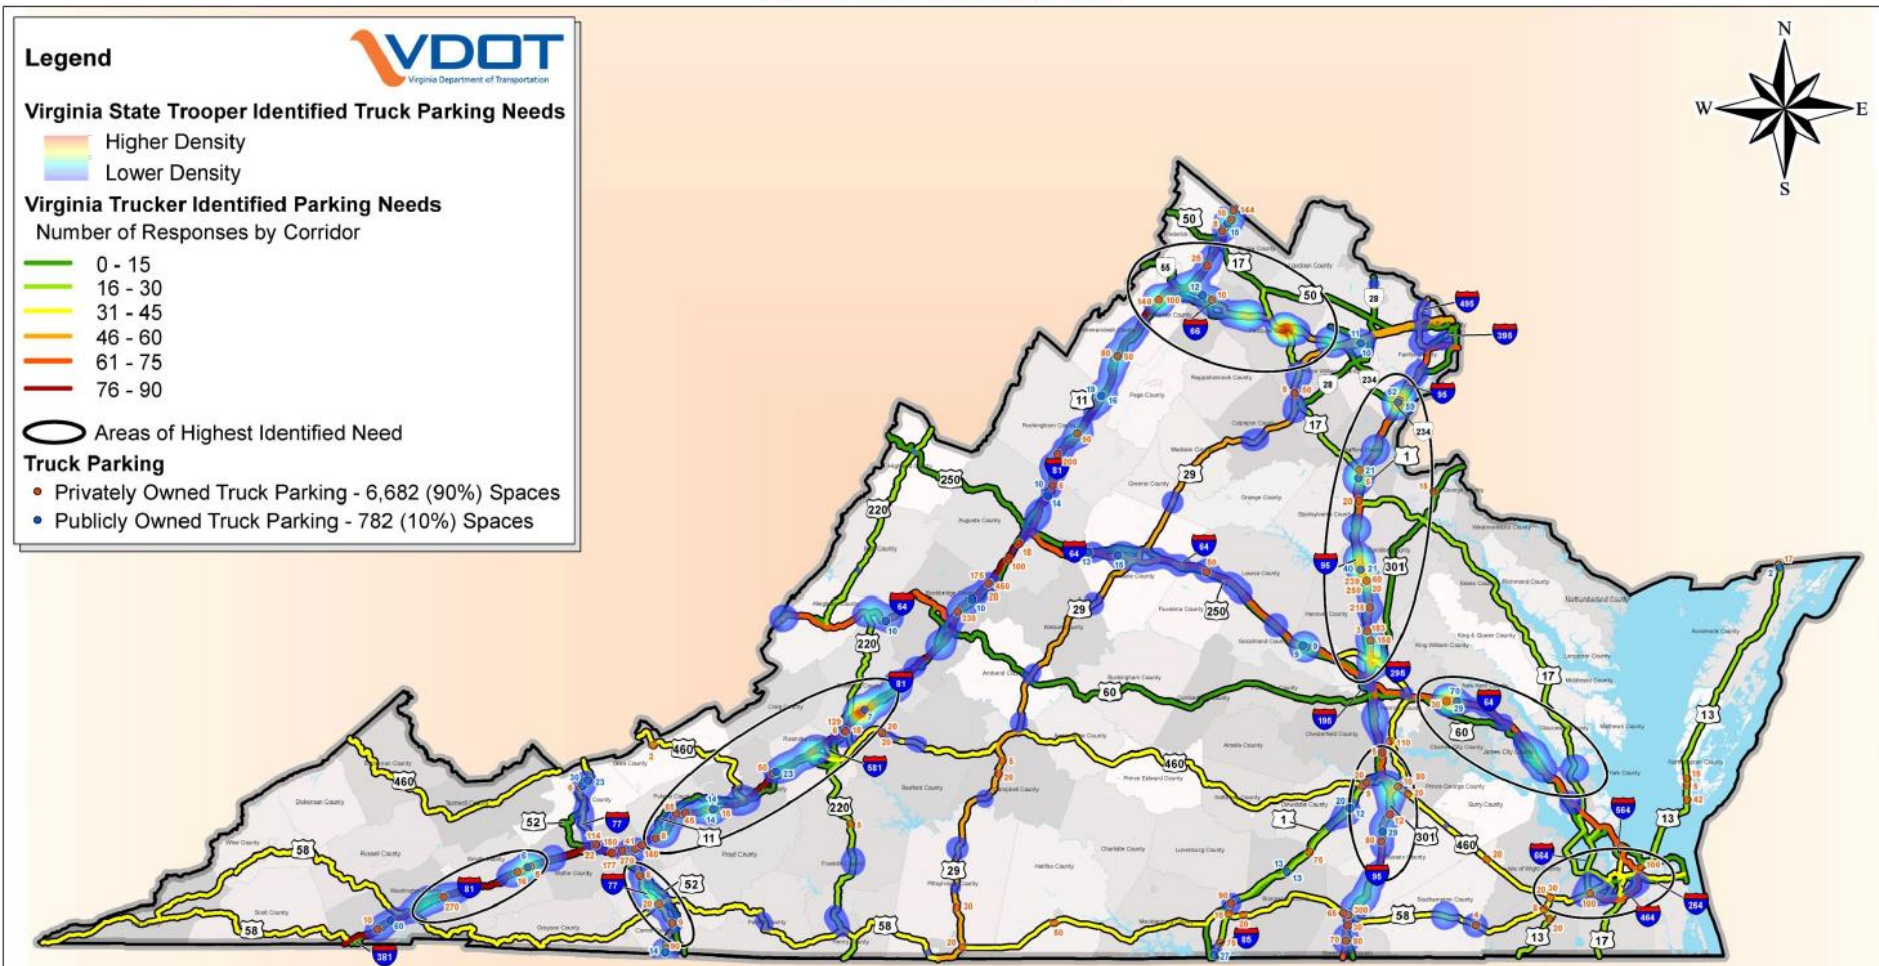

- **MAP-21**
 - **§ 1115 National Freight Policy** – improve performance of national freight network
 - **§ 1401 Jason's Law** – extended eligibility of federal funds for truck parking projects and requires state to conduct a truck parking study
- **CFR 49, Part 395 (Hours of Service)**
 - **11-hour driving limit** (after 10 hrs off)
 - **14-hour limit** (after 10 hrs off following on-duty)
 - **Rest Breaks** (8 hr limit since last rest period)
 - **60/70 Hr on-duty limit** (in 7/8 days)
- **CFR 23, Part 752 (defines Rest Areas)**
- **CFR 23, § 111 (limits commercialization)**

Virginia truck parking policies

- 24VAC30-50-10 – Waysides/Rest Areas parking and sleeping
- COV § 46.2-888 – no stopping on highways
- COV § 46.2-889 – location of parked vehicles
- COV § 46.2-1220, 1222.1, 1222.2, and 1224 – locality authority to regulate parking
- COV § 46.2-1223 – authority for **VDOT Commissioner** to regulate parking on primary/secondary system
- DMV Driver's Manual – guide on where to park and prohibitions.

Virginia State Police and Virginia Truckers identified areas of need

Figure 17: Truck Parking Survey Demand

35 Rest Areas have truck parking

Corridor	MM	Lot Name/Task	Spaces

Truck Parking Management Goals

- **Provide truck drivers access to real-time and accurate information about the availability of safe, legal parking places (public & private)**
- **Increase utilization of public truck parking spaces**
- **Reduce the time truck drivers take searching for available safe, legal parking spaces (public & private)**

Parking System uses multiple sensors

Controller sends raw data to central system

Entrance/exit detectors count vehicles in and out

Individual space detection identifies empty/occupied spaces

Pole mounted PTZ camera allows operators to resolve errors/issues

Parking Guidance System > Blue Mountain Plaza NB

Current Status

Space count is different

Real-time truck parking info can be shared using various tools

- **Using a dynamic parking sign in advance has mixed results.**
 - A 2007 study by University of California, Berkley campus report driver's preferred the VMS method for receiving information
 - A 2017 study by American Transportation Research Institute (ATRI) report driver's prefer using apps/websites.

- **511 Virginia product suite (mobile app, website and phone)**
- **3rd Party Applications (Park My Truck, Roadbreakers, Flying J, TA, etc.)**

Developed a prioritized list based on truck volume and occupancy

RANK	Interstate Facility	SITE NAME	Number of Spaces	ADT (Trucks)	OCCUPANCY (24 hr)
1	81 SB	Troutville	7	1499	892%
2	81 SB	Smyth	6	249	173%
3	81 NB	Mt Sidney NB	14	555	165%
4	81 SB	Winchester	15	499	139%
5	81 SB	Mt Sidney SB	10	332	138%
6	77 NB	Lambsburg	14	442	131%
7	81 NB	Radford SB	14	412	123%
8	81 SB	Fairfield	10	286	119%
9	81 NB	Radford NB	14	394	117%
10	81 NB	New Market NB	19	415	91%
11	81 SB	New Market SB	16	323	84%
12	95 SB	Fredericksburg	23	461	83%
13	64 EB	Goochland EB	9	176	82%
14	95 NB	Ladysmith NB	40	676	70%
15	64 WB	Goochland WB	9	148	68%

Preliminary Cost Estimate Statewide Truck Parking Solution

Corridor	Sites	Spaces	Total Estimate
I-66	3	20	\$384,188
I-81	11	190	\$1,498,688
I-95	3	105	\$469,187
Phase 1*	17	315	\$2,352,063
I-64	6	76	\$794,375
I-85	5	81	\$681,313
I-77	3	79	\$443,187
Phase 2	14	236	\$1,918,875
Total	31	551	\$4,220,937

Potential Cost Savings

- Not Using per space sensors \$1,029,654
- Not Using dynamic parking signs \$1,771,249

Implementation Plan for Phase 1

- **Acquire parking system using existing ATMS Contract (Q-Free)**
 - System operational – Summer 2017
- **Install field devices (sensors & signs) using a No-plan RAAP construction contract**
 - Complete Design by Summer 2017
 - Advertise contract in September 2017
 - Complete field installation by December 2018
- **Integrate data into 511 Virginia suite (existing contract)**
 - Complete integration of field devices by corridor (66, 81, and 95)
 - Share public parking information with NATSO
 - Post private space availability on 511 for real-time, accurate feeds
- **Accelerate I-66 corridor using ITS On-Call Task Order for pilot field installations**
 - Operational by Fall 2017
- **Phase 1 funded by ITTF funds**

Truck Parking System will provide operational and safety benefits

- **Travel Time**
 - Knowledge of space availability
 - Depletion of available hours of service
- **Operating Cost**
 - Improve freight delivery and reliability
 - Shipping time efficiency
- **Safety**
 - Eliminates fatigue
- **Operation and Maintenance**
 - Saves the cost of repairing shoulders and other roadways not built for CVO weights, which leads to pavement degradations
- **Maximizes use of existing infrastructure, no new infrastructure needed**
